## \$ A / PROFILE

### I modernize complex web platforms without breaking **what works**.

Lead developer and technical consultant at **bbox.digital**, serving as the primary client-facing technical lead within a lean two-developer team. I own 3–4 concurrent engagements from feature discovery and estimation through architecture, implementation, deployment, and production support. My specialty is **production-safe modernization backed by verified outcomes**.

## \$ B / PRODUCTION IMPACT

Releases shipped via  
CI/CD

ALGOLIA REQUESTS / MONTH

4,900,000 → 230,000

↓ 95%

Caching + request strategy — product behavior unchanged.

## \$ C / EXPERIENCE

### Lead Developer & Technical Consultant

MAR 2025 — PRESENT

**bbox.digital** · Remote

- Primary client-facing technical lead within a lean two-developer team — own 3–4 concurrent engagements end-to-end: feature discovery, scoping, estimates, technical direction, implementation, deployment, and support.
- Consult on UX/UI across client projects — surface design issues before implementation, propose alternatives, and design full features in Figma from written briefs.
- On inherited platforms, reverse-engineer undocumented behavior, choose pragmatic migration architectures, and verify production parity before cutover.

### Frontend Tech Lead

DEC 2021 — MAR 2025

**bbox.digital** · Remote

- Led a team of 3–4 developers — architecture decisions, code reviews, and technical direction — mentoring juniors and establishing standards across multi-repo codebases.
- Authored production web-component libraries used across multiple client platforms, and architected headless CMS (Squidex) for La Vitrine, Tel-Jeunes, and Institut TA.
- **Outcomes:** +100% CMS API efficiency, –20% external API calls, –95% Algolia search traffic (4.9M → 0.23M/mo), and +40% Google Search impressions from Core Web Vitals & SEO — instrumented via GCP Cloud Logging & Monitoring.

### Web Developer & Designer

MAY 2021 — DEC 2021

**Upwork** · Freelance · Remote

Designed and developed 5+ responsive client websites with Webflow, Figma, and JavaScript — clean UI/UX, scalability, and on-time delivery with clear client communication.

Porter Airlines · PAL Aerospace · Moncton Flight College

Leadership and training roles in commercial and medevac operations — precision under pressure, team coordination, and regulatory compliance, all directly transferable to software leadership and reliability engineering.

\$ D / SELECTED WORK

Télé-Québec en classe enclasse.telequebec.tv

Owned discovery, migration architecture, and frontend delivery: reverse-engineered an undocumented Paperbits/Knockout platform serving 11,000+ resources, chose its Next.js 15 replacement architecture, and delivered the migration across 4 repos. Preserved its design and French URLs, reached audited 100% parity across 60 production behaviors, and improved performance, reliability, maintainability, deployments, and content operations.

Next.js · React · TypeScript · Firebase · Algolia · Brightcove

La Vitrine Culturelle lavitrine.com

Built from day one; frontend tech lead 3+ years on a personalized cultural-event recommendation platform for Quebec — web-component library, cloud functions, routing layer, and headless CMS (Squidex) across 7 repos (1,833 commits).

TypeScript · Node.js · Docker · Squidex CMS · Algolia

Tel-Jeunes teljeunes.com

Free, confidential support platform for Quebec youth (chat, text, phone, anonymous forum). Architected the headless CMS (Squidex); 572 commits across 7 repos spanning web components, backend services, and Cloudflare Workers.

TypeScript · Node.js · Cloudflare Workers · Squidex CMS · Algolia

Classavatar classavatar.ca

Classroom-management platform for Quebec schools — student rewards, avatar progression, parent-teacher messaging, and subscriptions, with Stripe-backed payments and gamified domain logic.

Next.js · React · Firebase · Python · FastAPI · Stripe

Espace OBNL emploi.espaceobnl.ca

Job board and recruitment platform for Quebec nonprofits — frontend and backend across 2 repos (333 commits): user dashboards, authentication, and Stripe payments.

Next.js · TypeScript · Node.js · Firebase · Algolia
